PROFILE

Full-stack software engineer building business applications with Laravel, PHP, React and TypeScript. Experience in public-sector software and ongoing remote development at YadakShop, alongside independent full-stack projects.

TECHNICAL SKILLS

Backend: PHP, Laravel, MySQL, API development and database-driven workflows
Frontend: React, TypeScript, JavaScript, Redux, Vue.js, Inertia.js and Tailwind CSS
Delivery: Git, testing, responsive interfaces and remote collaboration

EXPERIENCE

Senior Software Engineer Nov 2025 - Present
National Statistics and Information Authority (NSIA) | Kabul, Afghanistan
- Develop and maintain internal web applications supporting organizational workflows.
- Contribute to backend logic, database-backed features, frontend interfaces and application maintenance.

Full Stack Engineer Mar 2023 - Present
YadakShop | Remote, Tehran Province, Iran
- Develop and maintain full-stack business applications using PHP and Laravel in an ongoing remote role.
- Implement API functionality, business logic, database workflows and frontend interfaces.

Junior Software Developer Jun 2020 - Aug 2021
Energy Services Regulation Authority | Kabul, Afghanistan
- Contributed to internal applications using Laravel Jetstream, Inertia.js, Vue.js, Tailwind CSS and MySQL.

Web Development Intern May 2017 - Aug 2017
Ministry of Communication & Information Technology | Kabul, Afghanistan
- Supported requirements documentation, software testing and maintenance.

SELECTED INDEPENDENT PROJECTS - FULL-STACK DEVELOPER

Hazara Mom Stitches | hms.naatrading.com
E-commerce website for Hazaragi clothing, with product collections, English/Persian interfaces, wishlist, cart and order tracking.
